

FAMILY 1

Family Business will be supporting an active Army National Guard service member and his family. This family of four has been displaced from their home for over five months after experiencing an electrical house fire. They lost most of their belongings in the fire, and their current focus is on gutting and repairing their home. Our team plans to provide this family with all the household essentials they will need as they rebuild their lives. Additionally, although the holidays are tough with this service member currently deployed in Kosovo, Europe, we hope to bring joy to his wife and two daughters' lives when they see new gifts under the tree.

FAMILY 2

Family Business will be supporting an active-duty National Guard service member who is currently deployed across seas. While deployed, the family has welcomed help in caring for their son, who has been diagnosed with autism. However, with their caregiver no longer able to work for the family, the father has had to leave his job to care for his son full time. The family struggles to make ends meet with one income. We hope to support this family during such a difficult time and provide them with household essentials and gifts to make their holiday special.

FAMILY 3

Our team will be supporting a current National Guard member who has experienced a significant loss of income this year. This service member had recently returned to work after having a baby boy and two weeks later experienced a work injury causing her to be out of work for longer than expected. This mother is doing her best to support her husband, who recently lost his job due to COVID and their three children, including two sons and a daughter. While this family is falling behind on bills, our team hopes to alleviate the financial strain of the holidays and provide gifts and necessities for the whole family.

FAMILY 4

Our team has partnered with Wesley Krombel, who will be raising funds to help support a current National Guard Specialist and her young daughter. This single mother has faced several physical and mental health challenges. From having COVID during her pregnancy to battling postpartum depression afterward, she experienced a significant loss of income while caring for her daughter and seeking help for herself.
